homogeneous cork

NATURAL CORK® HOMOGENEOUS TILES—NATURE ENGINEERED TO PERFORM

As one of nature's most renewable and sustainable resources, cork is one of the most environmentally responsible flooring options available. Unique in appearance, cork's distinctive beauty is enhanced by its warmth, resilience, and comfort underfoot. In addition, cork floors are inherently resistant to mold, mildew, and insects and provide improved sound and thermal insulation benefits to indoor environments.

Natural Cork® floors takes the natural beauty and unique, inherent performance benefits of cork flooring, eco-engineering improved commercial performance attributes, producing a cork floor like no other.

ENDURA AR+™ COMMERCIAL FINISH

For specifications requiring an applied urethane finish, Endura AR+™ provides an eco-based abrasion resistant finish with enhanced durability to the surface layer up to 7300 revolutions in the Taber abrasion test. We are so confident in this extraordinary finish that we back your Natural Cork floor with a 15 Year Commercial Wear Warranty.

ENDURA OS™ HARD WAX FINISH

For specifications requiring an easy-to-maintain floor with lower renovation costs, Endura OS™ Hard Wax commercial finish enhances the natural beauty and texture of the cork floor while protecting the surface with a factory-applied U.V. hard wax oil. In addition, an Endura OS finish allows for selective reparability to reduce downtime and minimize site disturbance when performing repairs or intensive spot maintenance.

- 15 Year Commercial Wear
- Lifetime Structure
- Custom Sizes Available
- Custom Colors Available
- Unfinished Available

CORK DÉCOR FLOORS:

- > Exceed E0 and CARB 2012 standards for emissions
- > Comply with the Lacey Act
- > Contribute to satisfying LEED credits:
 - MR 4.1 RECYCLED CONTENT
 - MR 6.0 RAPIDLY RENEWABLE MATERIALS
 - EQ 4.4 LOW EMITTING MATERIALS

ACRODUR® WATER BASED BINDER

Developed by BASF, Acrodur® replaces traditional resins used to manufacture cork flooring. Eliminating harmful ingredients from the binding process, such as phenol, formaldehyde, and isocyanates, Acrodur® significantly reduces the level of emissions without compromising the technical performance of the floor.

GREENGUARD® INDOOR AIR QUALITY CERTIFIED

Natural Cork® homogeneous glue-down tiles are certified under the GreenGuard® Indoor Air Quality certification program for low emitting interior building materials, furnishings, and finish systems and have been tested for their chemical emissions performance.

REDUCE INSTALLATION TIME AND MINIMIZE FAILURES DUE TO INSTALLATION

Natural Cork® Homogeneous Tiles are pre-buttered with installation adhesive at the factory. By eliminating the requirement to butter the back of each tile, Natural Cork® significantly reduces the amount of time required to install our homogeneous glue-down tiles. The number one reason for installation failures occurs when the installer fails to butter the back of the tile. By pre-buttering our homogeneous tiles, Natural Cork® diminishes the risk of installation failure and ensuring the performance of our homogeneous tiles in your commercial project.

USFCONTRACT is the commercial division of USFloors Inc. Nestled in the foothills of the Appalachian Mountains, in Dalton, Georgia, is the only cork and bamboo flooring manufacturer located in the United States. Founded in May 2001, USFloors features state-of-the-art finishing and profiling lines for flooring and moldings. USFloors manufacturing facility is the only manufacturing facility in Georgia utilizing solar photovoltaic panels, installed on its roof, to generate clean, renewable energy.

All of **USFCONTRACT** floors meet or exceed E0 and CARB 2012 standards for VOC emissions. Our Natural Cork® floors are produced with BASF's Acrodur® binders, eliminating harmful chemicals, including formaldehyde, from the manufacturing process. In addition, all of USFloors' cork products are GreenGuard® certified for indoor air quality. Our Natural Bamboo® strand woven floors specify Moso6™ Premium Bamboo with 6 Years Maturity to ensure that only mature bamboo harvested from managed forests and plantations is used to produce our bamboo floors. USFloors is a member of the U.S. Green Building Council.

Take the Next Step in sustainable commercial floors. At **USFCONTRACT**, we are in full stride.
